NTOA Member Tested and Recommended

The NTOA Member Tested & Recommended Program is designed to provide law enforcement product manufacturers with a process to have their products field-tested by the law enforcement community. It also ensures the law enforcement community the product has been field-tested and is recommend by their peers.

The BlackHawk CQB/Rescue (Rigger) belt is built with parachute quality buckles and adapters. The webbing is 45 mm Type 13 style and Type 12 style liner for the abrasion buffer. The CQB/Rescue belt is sewn on a Class 7 sewing machine for that complete confidence in life threatening situations. The belt has hook and loop along over half the length for securing the bitter end down.
