

Trijicon® Iron Sights

The First Choice of Professionals

There's a reason so many Trijicon® night sights are trusted by local, state and federal law enforcement agencies, as well as the most discerning pistol sports shooters on the planet: they're designed for faster target acquisition in any lighting situation, as well as engineered to take on abuse and still operate with precision.

Upgrade your iron sights with proven, superior aiming solution technology.

Tough**

The Science of Brilliant®

At Trijicon, we are bound by a commitment to industry-leading research, design, and testing to seek innovative aiming solutions that constantly redefine "brilliant." That's why every Trijicon night sight design is tested to the procedures below.

➤ **Alaska-to-Africa Temperature Tested**

To ensure each aiming solution is ready for whatever our users put them through, we perform "Alaska-to-Africa" temperature shock tests with temps from -20°F to 140°F.

➤ **Solid Zero Tested**

Our aiming solutions are designed to confirm no point of aim or point of impact shift occurs, giving you the precision you need. Every model is subjected to thousands of consecutive rounds.

➤ **Shock & Vibration Tested**

All sights are tested to withstand recoil and vibrational stresses without malfunction, so it can take a beating before, during, and after use.

➤ **Drop Tested**

Because we don't believe every drop should be followed by a warranty claim, we drop test each sight design to check for durability.

Trijicon® Fiber Sights

Trijicon® Fiber Sights are purposely engineered to bring the absolute brightest aiming point while retaining strength and maintaining a refined sight picture.

Trijicon DI™ Night Sights

Trijicon DI™ Night Sights feature a chemical and heat resistant fiber, finished with the same proprietary technique as the Trijicon ACOG®, coupled with a tritium lamp capped with a sapphire jewel. This dual-illumination technology amplifies collected light, ensuring an ultra-bright aiming point in any light.

Trijicon Bright and Tough™ Night Sights

Trijicon Bright & Tough™ Night Sights changed the iron sight landscape, and they continue to offer a superior alternative to traditional sights.

Trijicon® Suppressor/Optic Height Sights

Trijicon® Suppressor/Optic Height Sights are a continuation of the original Bright & Tough Night Sights, while being designed specifically for pistols fitted with suppressors and as backup iron sights for pistol-mounted red dot sights.

Trijicon HD™ Night Sights

Trijicon HD™ Night Sights are a self-luminous, three-dot night sight set that features a highly visible photoluminescent paint front outline to quicken sight acquisition, along with a “U” notch rear sight that’s angled and serrated to reduce glare and aid in front-sight focus.

Trijicon HD XR™ Night Sights

Building on the features of the popular HD™ Night Sights, the Trijicon HD XR™ Night Sights are designed with a thinner front sight post that allows the shooter to have a larger field of view which enhances the ability to identify and engage targets at longer distances.
